

Hubert De Backer

**Challenging the
limits of plastic**

Women's Health

HDB is also an innovator in gynaecological medical devices. We have therefore developed two standard types of vaginal applicators.

Our 5 ml vaginal applicator with M9 thread can be screwed onto tubes allowing the end-user to administer gels and creams smoothly.

In addition, we have a 6 ml vaginal applicator, without a thread, which is more suited to inserting capsules and pills into the vagina.

If you have a design or an idea for a new development in this field, we would be happy to hear from you. Together with our R&D department, we will further elaborate on your idea.

HUMAN
vaginal applicators

Hubert De Backer Vaginal Applicators

Cremes/Gels
